

Discussion Questions (Continued)

Application Questions (Real-World)

8. **Policy Implications:** If you were the Greek Minister of Health, which finding would you act on first, and how?
9. **International Transfer:** Would the findings apply to:
 - NHS England? Why or why not?
 - Portuguese SNS? Why or why not?
 - US public hospitals? Why or why not?

Advanced Questions (Extensions)

10. **Real Options Application:** How could you apply real options theory to model the government's decision about when to intervene in a struggling public hospital?
11. **Structured Finance Solution:** Design a financial instrument to help public hospitals manage the 1,485-day cash flow gap.
12. **Alternative Metrics:** If Z-scores don't work, what SHOULD we measure? Design a new index with 3-5 components and justify each theoretically.
