

Comprehensive Strengths vs. Weaknesses

✓ STRENGTHS

What the Paper Does Well

1. **Identifies important puzzle** - Traditional finance tools fail for public entities
2. **Comprehensive data** - Complete census of 90 hospitals
3. **Honest about limitations** - Acknowledges Z-scores are flawed
4. **Novel findings** - 1,485-day receivables lag quantified
5. **Gender diversity evidence** - Contributes to governance literature
6. **Policy relevance** - Identifies actionable problems
7. **Clear writing** - Well-structured and transparent

✗ WEAKNESSES

Critical Deficiencies

1. **Circular reasoning** - Uses invalid measure to test, then declares invalid
2. **No theoretical development** - Promises redefinition but doesn't deliver
3. **Wrong research design** - Cross-sectional for dynamic phenomenon
4. **Limited causal inference** - Bivariate tests only; no controls
5. **Atheoretical governance** - Crude proxies without mechanisms
6. **No CS theory engagement** - Describes but doesn't explain
7. **Narrow generalizability** - Single country, single year
8. **Methodologically dated** - 1980s approach vs. modern standards
